Industrial factory

Häfele in Długołęka,
Wrocław, Poland

System Manufacturer: Gór-Stal

Tata Steel Colorcoat™ product used:
Colorcoat HPS200™

Colours: Black and Petra

The building

Häfele in Długołęka near Wrocław, Poland was established in 2002. It is the sister company of a German corporation, which is one of the international leaders in the field of furniture fittings, architectural hardware, electronic locking systems and also provides advice on technical hardware. The central warehouse in Nagold daily manages 3,500 orders, 100,000 magazine spaces and stores over 50,000 products.

Colorcoat HPS200™

The building has a very modern and minimalistic look. The investor requested Colorcoat™ pre-finished steel to be used for the facades.

“The investor had previously used these materials for another building project and he was so satisfied with the choice.” says Roman Chodźba, Deputy Commercial Director at Gór-Stal, who supplied the facade systems using Colorcoat HPS200™.

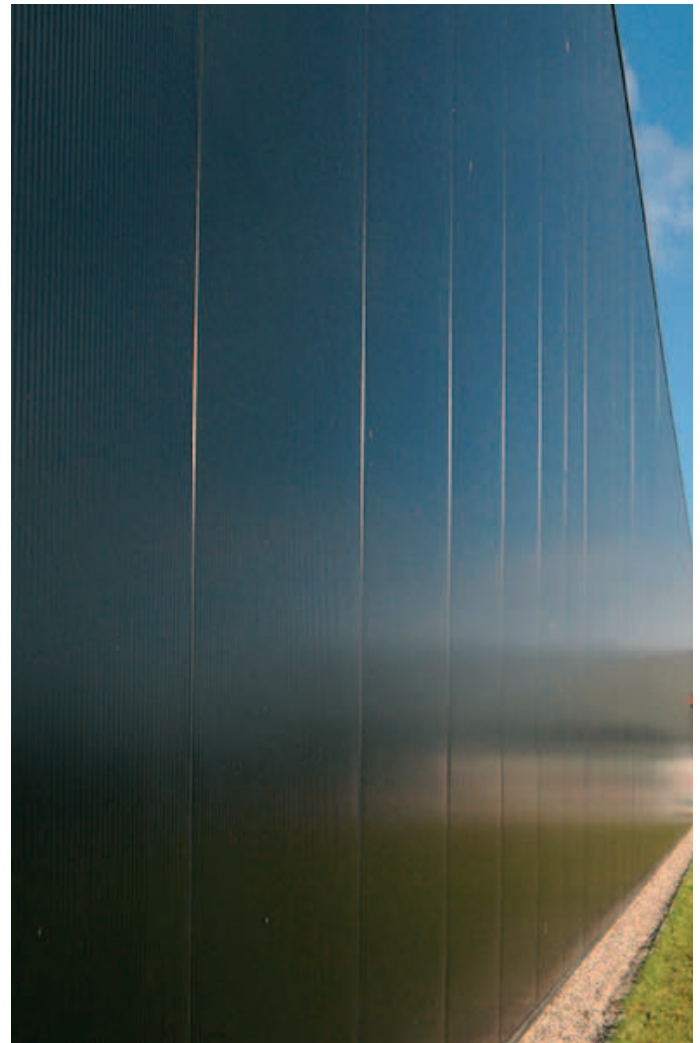

The unique Scintilla™ emboss with Colorcoat HPS200™ provides a unique guarantee of the products authenticity, while giving it a modern look and as the emboss is subtle – it does not detract from the overall appearance of the building.

For Häfele the colours Black and Petra were used because they emphasize the minimalist style, while the combination of black with a hint of red gives a dynamic appearance.

“I’m not surprised, Colorcoat™ pre-finished steel products are very high quality,” Mr. Chodźba added.

Colorcoat HPS200™ has an optimised Galvalloy™ metallic coating which is a blend of 95% zinc and 5% aluminum, providing unparalleled protection against corrosion, even at cut edges.

For this building project, Colorcoat HPS200™ was used, which has now been superseded by the latest generation of the product Colorcoat HPS200 Ultra™ which also has the unique Scintilla™ emboss and Galvalloy™ metallic coating. Colorcoat HPS200 Ultra™ is manufactured in the UK and further processed by system manufacturers in Poland into finished cladding systems for roofs and walls.
