

Sweden and Norway Steel Service Centres

Halmstad Steel Service Centre and Norsk Stål Tynnplater

Halmstad Steel Service Centre and Norsk Stål Tynnplater are the leading steel service centres in Scandinavia. Norsk Stål Tynnplater has a steel service centre in Fredrikstad, Norway, and a sales company in Malmö, Sweden. Halmstad Steel Service Centre is the first and only steel service centre in the Nordics to be TS-certified. Our strong processing capabilities deliver high output volumes for customers across a wide range of industries.

Products

Our product range available at Halmstad and Norsk Stål Tynnplater includes:

- hot-dip galvanised steels
- electro-galvanised steels
- aluminium zinc galvanised steels
- pre-finished or colour coated steels
- cold-rolled steels
- hot-rolled steels

Halmstad Steel Service Centre

Well-located

Our modern automotive steel service centre offers excellent processing capability and logistics for customers in Sweden and Norway. It is located at the port of Halmstad, Sweden, which is well-equipped for handling steel material including supplies from our own Tata Steel mills. Our convenient location is also:

- close to the main Gothenburg – Copenhagen road
- served by excellent rail and port facilities

Recognised capability

Processing capabilities at Halmstad Steel Service Centre comprise:

- four slitting lines
- two cut-to-length lines

Our main customers are in the automotive industry but we also supply customers producing construction-related equipment such as heating and ventilation systems. Our service centre was the first steel service centre in Sweden to obtain ISO/TS 16949 certification. This certification recognises our commitment to continuous improvement in order to meet customers' needs.

Customised solutions

We have a knowledgeable sales team who are dedicated to meeting your exact requirements for cut and slit material. Our goal is to always ensure quality in everything we do. We focus on quality from the moment we process your request until the finished product is delivered to you. To assist our customers, we also try to be as flexible as possible with warehousing and logistics arrangements. This enables us to deliver the right steel, in the right way and at the right time.

Processing capability

Halmstad Steel Service Centre has the following capabilities operated by highly-qualified people:

	Slitting	Decoiling
Thickness	0.3 - 4.0mm	0.4 - 3.0mm
Width	8 - 1310mm	< 1600mm
Length	-	300 - 6000 mm

We also collaborate with external partners for additional capacity and production opportunities. Please contact us and we'll find the best solution for your needs.

Norsk Stål Tynnplater

Norsk Stål Tynnplater in Norway serves a wide range of markets in Norway and Sweden including the automotive, building, mechanical and interior industries.

During our long-term customer relationships we have built a reputation for:

- short lead times
- reliable delivery

The majority of our sales comprise processed hot-dip galvanised and cold-rolled products. We offer the following services:

- slitting
- cut-to-length

Well-located

Our location at Fredrikstad, close to the Swedish border, means we can serve both the Norwegian and Swedish markets cost-efficiently. We utilise excellent rail and port connections with:

- roughly 60 per cent of all material arriving by rail
- around 40 per cent of material delivered to the nearby port of Fredrikstad
- Investing for improved efficiency

To further improve efficiency and safeguard short lead times, we have invested in a new 2,000 square metre coil warehouse to be located next to our service centre.

Processing capability

	Slitting	Decoiling
Thickness	0.4 - 3.0mm	0.4 - 3.0mm
Width	20 - 1550mm	< 1550mm
Length	-	300 - 4125 mm

Please consult our sales department regarding specific technical feasibility of dimensional combinations, tolerances and grades.
