

Colors

Tata Steel Colors has been a global leader in the development and manufacture of pre-finished steels for almost half a century. Our products are used in a range of settings including the automotive industry, construction and a wide array of domestic appliances, consumer goods and a number of specialist applications. We can deliver a resilient and durable base material enhanced by a high quality finish, and our customers know that they can rely on our product to stand the test of time and still look the part after years of use. We employ over 1,500 people across six manufacturing sites across Europe, and our UK career opportunities will be located at our Shotton site.

Tata Steel Building Systems UK is a downstream business within the Building Envelope Sector within Tata Steel:

Panels & Profiles

Panels and Profiles sell 'Envelope' and 'Structural' products predominantly into the construction industry. The product range is the most diverse in the marketplace, with an offering including structural roof and floor decks, built up roof and wall systems, insulated roof and wall panels, facades, flashings and associated ancillary products.

Colorsteels

The focus of this business unit is the Colorcoat Service Centre for the UK market - processing pre-finished steel products for the construction/manufactured goods markets into slit coil, sheet and blanks supplying flat panels, flashings, gutterings and associated products.
