Cladding contractor:
Montajes Y Cerramientos AI – Andalus S.L.

Tata Steel Colorcoat® product used:
Colorcoat Prisma™ (Roof and walls)

Colour: White (RAL 9003)

Azucarera Ebro

Beet sugar has been manufactured in Spain since 1882 when the first beet sugar factories were built. From 1889 to 1920, the industry witnessed a period of great growth, as the number of factories operating in Spain rose to over 50 following the expansion of sugar beet planting in many Spanish regions. When one factory closed, another would spring up to take its place.

In 1990, Ebro Compañía de Azúcares y Alimentación, S.A, and Compañía de Industrias Agrícolas, S.A, merged to form Ebro Agrícolas Compañía de Alimentación, S.A. In 1998, a second merger took place forming Azucarera Ebro Agrícolas, S.A. However three years later in 2001, another merger took place, forming Ebro Puleva, S.A, and recently in 2009, the British Sugar Group acquired Azucarera Ebro.

Colorcoat Prisma™

Located in Jerez de la Frontera Spain, the Azucarera Sugar factory was designed by the architect, D. Miguel Angel Lopez Dominguez, using Colorcoat Prisma™ in White on the roof and walls. Hierros Y Transformados, who was the system manufacturer, recommended Colorcoat Prisma™ to the architect, and provided the profiles. Montages Y Cerramientos AI – Andalus SL was the cladding contractor for the project.

“We recommended Colorcoat Prisma™ to Azucarera Ebro because the qualities of Colorcoat Prisma™ were better suited to the environment and from our point of view the product is different, but superior, to other products” stated Hierros Y Transformados.

The building owner was pleased with the colours on offer and the guarantee.

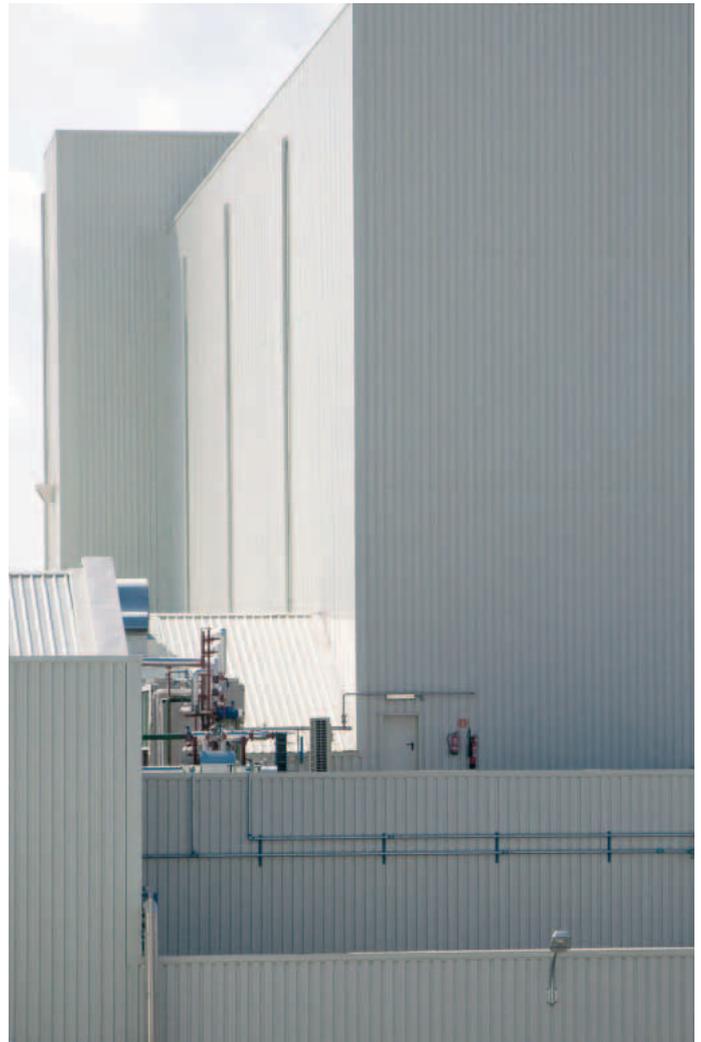

“The range of colours available was very good and the most important part was the guarantee that is provided to the customer”.

Colorcoat Prisma™ is designed to withstand the rigours of the external environment, versatile, lightweight and strong. Colorcoat Prisma™ pre-finished steel is the ideal choice for your building envelope for contemporary, long lasting colour. Whatever your type of building from warehouses to offices, or schools to houses, Colorcoat Prisma™ offers you a range of attributes that enables you to create beautiful, modern and durable roofs and walls. Colorcoat Prisma™ has a unique reverse side branding to make traceability easy, so that you can be rest assured that your building is protected with the highest quality from Tata Steel (formerly Corus).

The building owners and architects of the Azucarera Sugar factory project have been very pleased with the result of Colorcoat Prisma™. They highlight the great quality differences between Tata Steel Colorcoat® branded products compared to other pre-finished steel as well as the Confidex® Guarantee for industrial and commercial buildings. The Azucarera Sugar Factory is covered by the Confidex® Guarantee with 15 years for the roof and 20 years for the walls using Colorcoat Prisma™.

For Southern Europe, the Confidex® Guarantee, allows for up to a maximum of 25 years with Colorcoat Prisma™ on roof and walls with no inspection or maintenance necessary to maintain its validity, giving you peace of mind. The guarantee is clear and simple right from registration and can be easily transferred in the event of a change in building ownership.

Colorcoat Prisma™ and Colorcoat HPS200 Ultra™ are two of the leading products in the industry for roofs and facades. Tata Steel has nearly 50 years experience of developing and manufacturing pre-finished steel.
