

TATA STEEL

Celsius® 355 NH test certification

Visible quality assurance

Our details

Corby or Hartlepool

Your details

Notified body Approval Number 0038 –

Lloyds Register Verification Ltd

Additional information required for CPR CE Marking

Product details

Test results – Yield Stress, Elongation, Tensile Strength, Impact Tests

Minimum 14 chemical elements confirms

Celsius® 355 NH is fully killed fine grain steel.

J2 only requires 5 chemical elements:

C, Si, Mn, P and S so fully killed steel (Ff) is not immediately obvious.

Multilingual interpretations of code numbers are printed

in full on the reverse side of the inspection certificate

compliance with European Regulation. The CE mark shown in Corby Works Inspection Document is only applicable to product standards (EN 10210) EN 10219, EN 10255) harmonized with the Construction Products Regulation (CPR) 89/106/EEC. Corby Works Quality System complies with the Pressure Equipment Directive (PED) 97/23/EC Annex I Para 4.3. For end users - only tubes in accordance with EN 10217 have a presumption of conformity with the PED. Certified by Tata Steel UK Limited and comply with the requirements of the Product Description.

Weld seam test
which is mandatory for certification
(not required for 2.2 test report)

Non-mandatory tests which we
guarantee for our quality control
and your added assurance

Lower CEV than non alloy (J2)

A CERTIFIED PRODUCT THAT YOU CAN RELY ON

When you specify **Celsius® 355** hot finished hollow sections, you need to be sure that the correct material has been supplied. Use of substitutes can result in an inferior structural performance – with serious consequences.

To give you confidence, we've made sure that **Celsius® 355** is sold only with full certification. The Inspection Certificate Type 3.1 supplied with this product is your guarantee that **Celsius® 355** is manufactured exclusively from fine grain, normalised steel to EN10210:S355NH standard. For building structures, this means complete assurance that your materials comply with the material requirements of all relevant British and European standards.

The Inspection Certificate Type 3.1 supplied with **Celsius® 355** gives you all the information that you need for peace of mind. It clearly shows:

- a description of the product - including confirmation of a 2T corner profile
- the mandatory tests undertaken for EN10210:S355NH certification
- the additional, non-mandatory tests undertaken by Tata Steel for extra quality assurance
- full chemical analysis (14 chemical elements) confirming that **Celsius® 355** is produced using fully-killed, fine grain steel – and providing you with full visibility and traceability
- the CE mark to prove that the material is fully compliant with the European Construction Product Regulation
- the Tata Steel name and symbol – providing assurance that your product is from a proven, reliable and fully traceable source

Celsius® 355 Hot Finished Hollow Sections

- Formed at normalising temperature
- Higher sectional properties
- Fine grain structure
- Uniform mechanical properties
- Weldable in corner regions
- Higher compression capacity
- Negligible residual stress
- Tighter corner profile
- Suitability for galvanising
- Fire resistance capability
- Proven dynamic performance
- Guarantees full compliance with EN10210: S355NH
- Guarantees Specific Inspection so material matches test certificate
- Guarantees a minimum charpy impact, average value of 40J @ -20°C
- Guarantees full compliance with CE marking under the Construction Product Regulation (CPR)
- Tighter corner profile of 2T better than EN10210 which is to a maximum of 3T
- Meets and exceeds the J2H specification
